Currently, the aforementioned municipal waste is used as fuel for the power plant with a generating capacity of 4.5 megawatts, generating income for the company at approximately 18 million baht per month. In 2018, the plant is expected to install additional equipment in order to generate another 1 megawatt of power, resulting in a total generating capacity of 5.5 megawatts.

1.3 <u>Biomass Power Plant</u> is operating under the subsidiary, IEC Sakeao 1 Co., Ltd. (formerly known as Kaew Lamduan Power Supply Co., Ltd.), with a generating capacity of 9.9 megawatts. It uses materials such as woodchips, Eucalyptus bark, and materials left over from seasonal agriculture as feedstocks, which is sufficiently found in the area of Sakeao Province.

The biomass power plant has a non-firm type PPA with PEA for, under which IEC Sakaeo 1 Co., Ltd. receives a feed-in premium (Adder) for Small Power Producers at 0.30 THB per kilowatt hour for a 7-year period, and has been operating for commercial purposes since 10 April 2013. As such, its income is as per the standard PPA, calculating from the distributed units of electricity. In the current PPA, IEC Sakaeo 1 Co., Ltd., has been authorized to a Feed-in tariff (FIT) in the Adder system as of March 2016 with a contract period of 17 years.

# 2. Recycled Plastic Pellets from Plastic Waste Business

This project is operated by The International Engineering Public Company Limited. At present, there is a market demand for recycled plastic pellets, both domestically and internationally, especially China who are unable to import plastic waste, leading to a high demand in processed recycled plastic pellets, and a good opportunity for the Company to supply this demand with the mass production of recycled plastic pellets.

Because the Company was unable to increase capital in 2017, this had affected the quantity of raw materials in Quarter 4/2017 up until now. It is expected that after the capital increase effort is successful, the production capacity can be increased up to 500 - 1000 tons a month within Quarter 2, 2019.

# 3. Information and Communication Technology (ICT) Business

The Company operates as a System Integrator (SI), which covers all services concerning the installation of information and communication technology (ICT) systems, including the design and application of hardware systems, software systems, and network systems frameworks to meet the needs of the client. Source: Thailand Power Development Plan (PDP) 2015 considered by the National Energy Policy Council (NEPC), approved on 14 May 2015, the Cabinet acknowledged on 30 June 2015

The Group is determined to develop renewable energy in the country in accordance with the Thailand Power Development Plan (PDP). At present, the Group has a collective generating capacity distributing for PEA at approximately 18 megawatts (3 megawatts in waiting to be opened for commercial purposes) generated from 3 main renewable energy power plant projects: the solar power plant, the biomass power plant, and the waste-to-energy power plant. With the experience and expertise in the operations of renewable energy businesses in a tangible way, the Group has the potential and the competitive advantage in the renewable energy business for the sustainable and foreseeable future. As such, it is expected that government authorities will expand the licensing for private companies to help generate electrical energy in Thailand as per the PDP. In addition, the increased turnover and financial strength in 2014 has earned the Group the trust in its potential to expand the business from investors, financial institutions, and government authorities issuing various permits.

Furthermore, the recent direction of the country's development and large investors' policies has had a positive effect on the status of the industry and ICT business in the country

with the opening of many telecommunications services, broadcasting businesses, and radio and television businesses. These projects all have a significant effect on investments in ICT, leading to a demand for solutions in network systems, control systems, operations support systems, and corporate customers' businesses. As such, the Company can benefit from the expansion of the Systems Integrator (SI) business, in which the Company already has the expertise and a large customer base. In addition, the delivery of the ICT systems works in the past year have been successful, earning the trust of both the client and business partners.
