Construction is already completed on the waste-to-energy power plant, and has been distributing electrical power for commercial purposes for PEA since 11 December 2014. Currently, the aforementioned municipal waste is used as fuel for the power plant with a generating capacity of 4.5 megawatts, generating income for the company at approximately 18 million baht per month. In 2018, the plant is expected to install additional equipment in order to generate another 1 megawatt of power, resulting in a total generating capacity of 5.5 megawatts.

- 1.3 Biomass Power Plant is operating under the subsidiary, IEC Sakeao 1 Co., Ltd. (formerly known as Kaew Lamduan Power Supply Co., Ltd.), with a generating capacity of 9.9 megawatts. It uses materials such as woodchips, Eucalyptus bark, and materials left over from seasonal agriculture as feedstocks, which is sufficiently found in the area of Sakeao Province.

The biomass power plant has a non-firm type PPA with PEA for, under which IEC Sakeao 1 Co., Ltd. receives a feed-in premium (Adder) for Small Power Producers at 0.30 THB per kilowatt hour for a 7-year period, and has been operating for commercial purposes since 10 April 2013. As such, its income is as per the standard PPA, calculating from the distributed units of electricity. In the current PPA, IEC Sakeao 1 Co., Ltd., has been authorized to a Feed-in tariff (FIT) in the Adder system as of March 2016 with a contract period of 17 years.

## **2. Recycled Plastic Pellets from Plastic Waste Business**

This project is operated by The International Engineering Public Company Limited. At present, there is a market demand for recycled plastic pellets, both domestically and internationally, especially China who are unable to import plastic waste, leading to a high demand in processed recycled plastic pellets, and a good opportunity for the Company to supply this demand with the mass production of recycled plastic pellets.

Because the Company was unable to increase capital in 2017, this had affected the quantity of raw materials in Quarter 4/2017 up until now. It is expected that after the capital increase effort is successful, the production capacity can be increased up to 500 – 1000 tons a month within Quarter 2, 2019.

## **3. Information and Communication Technology (ICT) Business**

## **2. Industry Status and Competition**

The Alternative Energy Development Plan (AEDP) estimated the installation of renewable energy power plants nationwide including the renewable energy power producers who would directly distribute electrical power for the Electricity Authorities in order to deduct from the needs of the Electricity Authorities, to forecast the demand for electrical power in the Electricity Generating Authority of Thailand (EGAT) system and in the country. AEDP estimated the generating capacity of Very Small Power Producers (VSPP) as follows:

Types of renewable energy as indicated in the table

Unit: megawatts

Year	Solar	Wind	Water	Waste	Biomass	Biogas	Energy Crops	Total
2016	3,390	66	70	100	337	1,842	-	5,805
