

Sector reclassification of IEC

SET has defined for revision and transferring the securities of listed companies into a more appropriate business sector by consideration of the business that generates most revenues. If there is not any business that generates most revenues to listed companies, then SET will consider other criteria; the annually revisions of the listed companies' sector suitability.

Based on listed companies' revenue structures, along with their business operations and the companies' information from Form 56-1 for the year 2015, The International Engineering Public Company Limited (IEC) has core revenue from energy business and the company has a policy to operate renewable energy as core business.

Therefore, SET will transfer securities of IEC to its more appropriate business sector from the "Information & Communication Technology" sector under the "Technology" industry group to the "Energy & Utilities" sector under the "Resources" industry group, effective from July 4, 2016 onwards.
