26th April 2019

Re: Increase in COD Electricity Generation Capacity at GIDEC Waste-to-Energy Power Plant

Attn: President
Stock Exchange of Thailand

The International Engineering Public Company Limited (“The Company”) would like to report about GIDEC Co., Ltd. (“GIDEC”), the Company’s subsidiary and the operator of a waste-to-energy power plant at Khuanlang, Hat Yai, Songkhla province, which has been commercially producing and distributing electricity for the Provincial Electricity Authority (PEA) since 11 December 2014 with the maximum record production capacity of 5.4 MW.

As of current, GIDEC has made an improvement and enhanced its production capacity at said power plant which has been effective since 12 February 2019. GIDEC was able to increase its commercial electricity generation and distribution capacity for the PEA to the maximum production capacity of 6.5 MW, which is the maximum capacity according to the power purchase agreement made with the PEA. This will prove beneficial to the overall revenue of the group due to said increase in electricity that could be sold.

Please be informed accordingly.

Yours faithfully,

(Mr. Dumrong Putiput)
Chief of Executive Officer
